

Research shows that **67%** of the population has experienced at least **ONE Adverse Childhood Experience.**

These trauma-based adversities are predictive of a multitude of toxic **PHYSICAL, MENTAL, & SOCIAL** outcomes throughout a person's lifetime.

As a society and as individuals, we need to be better informed and prepared to prevent and address the traumatic impact of childhood adversities. In this multi-media, interactive workshop, participants work together to build a powerful image that helps them appreciate the complex nature and its aftermath.

Schuylkill IU29 presents
